The course is designed for manufacturers, services companies, and overhaul facilities, who require their personnel to be trained in the application of Visual Testing techniques. As well as covering all the theoretical aspects of this method, the course includes processes of improving visual inspection reliability and the use of a variety of visual equipment. The course satisfies the training hours needed for both Level I and II certification in accordance with SNT-TC-1A, ANSI/ASNT CP-189, and NAS-410.
